

IPD Products for Caterpillar®  
C15 INDUSTRIAL ENGINES

The Standard for Quality, Innovation, Service and Support Since 1955

# IPD Parts For C15 Industrial Applications

IPD now offers Cylinder Kits and components for C15 Industrial applications. IPD has a great deal of experience manufacturing high quality replacement parts for a wide range of Caterpillar brand engine applications, and IPD continues to lead the aftermarket with a growing range of parts for the popular C-series engine line.

These new kits include a new **IPDSteel®** friction welded piston design (patent pending), which features an integral cooling oil reservoir formed in the crown, providing the following benefits:

- Improved crown strength & flex resistance, particularly at the sealing ring area
- Superior protection against excessive oil consumption, operating temperatures, and combustion blow-by
- Improved design over one-piece piston designs with two-piece oil dam inserts

These kits are available with a standard OE style liner, and also with IPD's innovative **IPDStyle®** Crevice Seal Liner for superior performance. The crevice seal is a wide rectangular shape seal placed into a special tapered liner groove, which provides a wider contact surface deeper into the engine block for improved sealing, and a wedge effect when the liner is installed for securing the liner firmly in place, thus minimizing liner movement.

PART NUMBER	ITEM DESCRIPTION	NOTES
PLG3466615	CYLINDER KIT	16:1 COMPRESSION RATIO, SELECT INDUSTRIAL APPLICATIONS
PLG3466615/CS	CYLINDER KIT	16:1 COMPRESSION RATIO, SELECT INDUSTRIAL APPLICATIONS W/ CREVICE SEAL LINER
PLG3466616	CYLINDER KIT	18:1 COMPRESSION RATIO, SELECT INDUSTRIAL APPLICATIONS
PLG3466616/CS	CYLINDER KIT	18:1 COMPRESSION RATIO, SELECT INDUSTRIAL APPLICATIONS W/ CREVICE SEAL LINER
