

IPD ADDS VALVETRAIN COMPONENTS TO DETROIT DD15 APPLICATION

IPD was the first to market with an engine rebuild kit for the DD15. The response has been so positive that we keep adding new components to our lineup because our customers are asking. First, we added a head bolt kit, then an upgraded cryo-treated head bolt kit. Now our latest offering is quality, precision-engineered valvetrain components. Both intake and exhaust valves have an induction-harden tip with the exhaust valve featuring a cobalt-chromium alloy hardface seat for ultimate high temperature resistance.
